## THE USURPERS FUTURE WARS

### SCORCHED EARTH

See the missiles in the air  
There's no shelter anywhere  
Death streaks across the sky  
There's nowhere to hide  
Up above explodes a sun  
The light of 20 megatons  
Everything begins to burn  
Our resting place: a scorched earth

### Is there to be a future

Will we even have a say  
Will they push the button  
Armageddon any day  
Is this all for nothing  
Is our world doomed to burn  
Will they pull the trigger  
Will this be a scorched earth

Nuclear weapons armed  
Cruise missiles and bombs  
Nuclear submarines  
Prepared for World War 3

Don't take for granted this life  
Any moment we could die  
The warning may never come  
Just the blast of an H-Bomb

They tax away our money  
To fund the military  
But you don't need an army  
Unless you have an enemy  
Russia versus NATO  
Ready to explode  
If someone pulls the trigger  
There will be nowhere to go

### FUTURE WARS

American drones will  
Patrol the skies  
In control rooms  
They'll decide who dies  
Behind a desk  
The pilot sits  
Will he feel remorse  
When he flicks the switch  
In the future wars

### Future wars

They are already planning  
The future wars

### In back rooms

The deals have been made  
To buy the weapons  
With the taxes you'll pay  
For the future wars

### Future wars

How many will die  
In the future wars  
The casualty numbers  
Are all in the plan  
Plans for the Russians  
Plans for Iran

### Satellites

Will fill the sky  
Every movement  
I will be analyzed  
Particle beams  
Will rain from the sky  
When they find their target  
Its you that dies  
In the future wars

### Future wars

They are already planning  
The future wars  
In back rooms  
The deals have been made  
To buy the weapons  
With the taxes you'll pay  
For the future wars

### Future wars

How many will die  
In the future wars  
The casualty numbers  
Are all in the plan  
Thousands dead  
In Pakistan

Controlled by  
The mass media lies  
The mindless masses  
Will be hypnotized  
Next war starts after  
This commercial break  
The case has been made

But the reasons are fake  
In the future wars

### Future wars

They are already planning  
The future wars  
In back rooms  
The deals have been made  
To buy the weapons  
With the taxes you'll pay  
For the future wars

### Future wars

### How many will die In the future wars

The casualty numbers  
Are all in the plan  
They want to go  
Back to Afghanistan

### WE ALL LOSE

Election results always obscene  
Results of the two party scheme  
No matter which  
The outcome is  
evil you choose  
we all lose

We all lose It is sickening  
We all lose It is evil who wins  
We all lose If we play  
This wicked game  
We have no one else to blame

### Every option is so foul

Results are always horrible  
Resigned to no better choice  
Our ballot in Pandora's Box  
We get the choices we accept  
We pick the least poisonous  
Content to choose the  
Least worst  
We get the government  
We deserve

### Don't make choices

That feel so vile  
Don't support the  
Wearers of false smiles

### PUNKS AND ROGUES

See it in their eyes  
And see it in their faces  
Angry stares  
Defiance and hatred  
Hate for your system  
Hate for your wars  
Hate for your government  
And rule of law

An uncontrolled force  
Contained by none  
They're the young  
Defiant ones

They'll smash the barricades  
And scale the walls  
Punks and rogues  
Won't be ruled by laws

### Packs of wolves

Running down the street  
They have each other's backs  
And they won't retreat  
Wild animals  
Who won't be chained  
They won't live their lives  
In your safe little cage

They live for freedom  
They won't live in fear  
They've been to hell and back  
And now they're here

Outsiders who  
Step out of bounds

Punks and rogues  
Live only for now

Trouble in the city  
Trouble on the street  
Chaos taking over  
Police on the retreat

Up from the gutters  
Not under heel  
Your force of arms  
Can't contain them all

They're not going to be  
Society's tools

They're going to  
Live their lives  
For breaking your rules  
Chaos is the method  
To subvert your rule  
Punks and rogues  
Won't be ruled by you

### THE ENEMY WITHIN

That voice you hear  
Inside your head  
I wish I wasn't, I wish instead  
If only I could, I know I can't  
Not good enough, I wish I was dead

Creeping doubts  
Relentless fears  
Have held you back  
And will for years

No one hates you  
As much as yourself  
Beat that and you  
Can beat anything else
